

PRA-2182

19" 2U Rack-mount Keyboard Drawer with 12.1" TFT Display

- ◆ Meet EIA-RS-310C and IEC-297-3 specifications
- ◆ Power of a high-performance monitor in a compactly integrated 2U enclosure
- ◆ Anti-glare tempered glass for added protection to LCD screen
- ◆ Automatic LCD shut off when not in use without shutting down the main system
- ◆ Simple and polished design will enhance the value of the end-product
- ◆ 12.1" TFT LCD display, high luminance
- ◆ Rugged construction for harsh environment operation

PRA-2182 is the industrial drawer that offers many unique advantages over the traditional devices. This industrial monitor keyboard features a large-sized monitor in a compact 2U high unit occupying only a fraction of the space of traditional monitor and keyboard units. The spectacular display of an 12.1" LCD screen coupled with a full-sized keyboard with built-in pointing device is now available in only 2U height.

Designed for 19" rack-mount cabinets in a convenient drawer form, PRA-2182 is the most ideal solution to

maximize usable cabinet space. With built-in analog-to-digital conversion board, the PRA-2182 can be connected to any standard VGA graphics card for immediate screen display.

The monitor keyboard unit has a built-in slide rail and mounts easily onto any 19" cabinet. Simply pull the unit out to access the system. When closed, the unit lock will limit system access and thereby provide certain degree of security.

General

Construction

Heavy-duty steel

Keyboard/Mouse

108-key keyboard with integrated GildePoint touch pad. Key pad.

Flat Panel

- 12.1" TFT/DSTN 800x600
