

# 250 amp, -48 VDC Wall Mount Distribution Cabinet

## Key Features

- **Compact Wall Mount Design**—eliminates costly long cable runs and space consuming equipment racks
- **Fuse or Circuit Breaker Configurations**—with protection ranges to meet a broad range of applications
- **Alarm Card**—provides local and remote alarm signaling
- **Load Monitoring**—can be included for added system protection
- **UL Listed**—compliance to local codes

## Description

The Lorain® 250 amp, -48 VDC wall mount distribution cabinet can be configured for fuse or circuit breaker protected distribution. The compact cabinet can be factory configured with nine 3 through 60 amp TPS fuse or twelve 1 through 50 amp circuit breaker positions. Local or remote alarming can be achieved with an optional alarm relay circuit card. An optional shunt can be specified to monitor distributed loads. The easy to install, 15.25" (38.74cm) wide x 18.5" (46.99cm) high x 7" (17.78cm) deep cabinet is designed to mount in confined space areas.

## Application

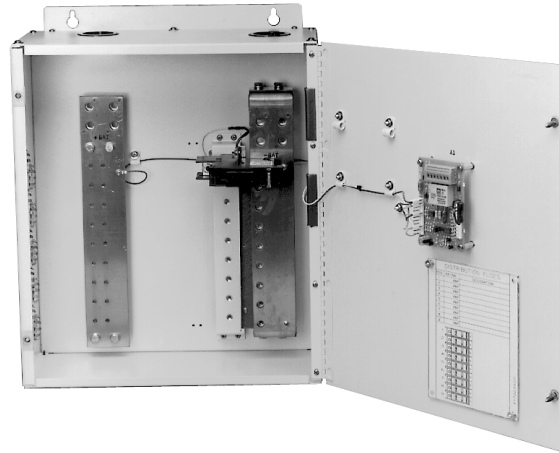

The Lorain -48 VDC wall mount distribution cabinet is ideal for central office, customer premise and special service applications where space limitations prohibit equipment racks and bulky cable routing.

## Additional Information

For additional specification, engineering and installation information, specify model 250 amp, -48 VDC wall mount distribution cabinet, spec. number 582116300.
