### How To Order

1. Specify required low voltage disconnect panel by part number from the above table.
2. Specify any lug adapters by part number from the above table.
3. Specify quantity and part number of lugs from the lug tables as required.
4. Specify required voltage limits if different than standard factory settings shown in the above table.

## Application Notes

1. Factory voltage settings for low voltage disconnect applications will be as shown in the nominal voltage table unless otherwise specified.
2. Lug adapters are for low voltage disconnects up to 600 amp only. For larger capacity, special bus bar arrangements are required.

NOMINAL VOLTAGE	LOW	HIGH
24	20.0V	25.0V
48	42.0V	49.0V

## CONTACTOR LUG ADAPTERS
