

Trimount

Bracket

The Trimount Bracket allows the installation of three Carrier Access Corporation Access Banks, along with three power converters, using three power converters, using minimal wall space.

Operational Description

The Carrier Access Corporation® Trimount Bracket is designed to wall mount three Access Banks®, along with three power converters. The three units can be accessed for all normal service and configuration changes. All LEDs are visible. The bracket is designed with clearance for wiring terminal blocks, including during the removal of Access Bank line cards for service operations.

Physical Description

Size: 11.5"L x 12"W x 29"H
